Primecoat Series 29

thermosetting powder coating architectural application polyester

SAFETY DATA SHEET

according to Regulation (EC) No 453/2010 (REACH)

Version 1 Issue date: 20.06.2018

Section 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name Primecoat Series 29

Product description Paint

Product type Polyester powder coating

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses Coating agent for the creation of protective and deco-

rative coatings on metal products

1.3. Details of the supplier of the safety data sheet

Primatek Coatings OÜ phone + 372 655 1010

Kadastiku 29A, 21004 Narva,

Estonia

Regional Representative Primatek Coatings Finland Oy

phone + 372 5671 1136 Teknobulevardi 3-5,

01530 Vantaa,

Finland

Dept. responsible for information info@primatek.eu
Emergency telephone number + 372 655 1010

Section 2: Hazards identification

Classification according to EC regulation 1272/2008 (CLP)

2.1. Classification of the substance or mixture

Product definition: Mixture. Not classified as dangerous according to 1272/2008.

2.2. Label elements

Signal word: "Warning" sign on the box

Hazard statements: No known significant effects or critical hazards

Precautionary statements

General Not applicable

Prevention P261 – Avoid breathing dust

Response Not applicable

Storage P.7.1 Disposal P.13

Supplemental label For professional use only. May produce an allergic re-

elements action.

2.3. Other hazards

Other hazards which do not result None known.

in classification

Section 3: Composition/information on ingredients

Substance/mixture Mixture

There are no ingredients present which, within the current knowledge of the supplier and in

the concentrations

applicable, are classified as hazardous to health or the environment and hence require reporting in this section. Multicomponent disperse systems of solid particles - polyester film-forming base with pigment, filler and

targeted additives.

Occupational exposure limits, if available, are listed in Section 8.

Section 4: First aid measures

4.1. Description of first aid measures

General information First aider: pay attention to self-protection! In case of

any accident move the victim out of danger zone. Do not leave affected person unattended. Seek medical atten-

tion if necessary.

fresh air, take the dirty clothes off and keep at rest. If

you feel unwell, seek medical advice.

In case of skin contact

Thoroughly wash skin with soap and water. Do not use

solvents or thinners. Remove contaminated clothing.

After eye contact If product gets into the eye, keep eyelid open and rinse

immediately with large quantities of water, for at least 10 minutes. Remove contact lenses, if any. In case of trou-

bles or persistent symptoms, consult an opthalmologist.

After swallowing Have victim repeatedly drink large amounts of water wit

Have victim repeatedly drink large amounts of water with activated charcoal. Do not induce vomiting. No administration in cases of unconsiousness or cramps. Rinse mouth immediately and drink plenty of water. Observe risk of aspiration if vomiting occurs. Get medical ad-

vice/attention.

4.2. Most important symptoms and effects, both acute and delayed

Symptoms No known symptoms to date.

4.3. Indication of any immediate medical attention and special treatment needed

Information to physician No known symptoms to date.

Section 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media In case of fire: Use water spray, dry powder, foam or

carbon dioxide for

extinction.

Extinguishing media which must not be used for safety reasons

Strong water jet and carbon dioxide gases under

presussure.

5.2. Special hazards arising from the substance or mixture

Special protective equipment for

firefighters

Exposure to fire produces thick, black smoke that is

hazardous to health. Do not breathe smoke.

5.3. Advice for firefighters

Special exposure hazards arising from the substance itself, combustion products, resulting gases

Wear self-contained breathing apparatus.

Additional information Do not allow fire water to penetrate into surface or

ground water.

Section 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency

personnel

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put

on appropriate personal protective equipment.

age, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in

"For non-emergency personnel".

6.2. Environmental precautions

Environmental precautions

Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

6.3. Methods and material for containment and cleaning up

Small spill Move containers from spill area. Vacuum or sweep up

material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contrac-

tor.

Large spill Move containers from spill area. Prevent entry into sew-

ers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed

waste disposal contractor.

6.4. Reference to other sections

Reference to other sections See Section 1 for emergency contact information.

See Section 8 for information on appropriate personal

protective equipment.

See Section 13 for additional waste treatment infor-

mation.

Section 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

7.1. Precautions for safe handling

Precautions should be taken to prevent the formation of dusts in concentrations above flammable, explosive or occupational exposure limits. Respiratory protection is needed.

Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition sources.

Mixture may charge electrostatically: always use earthing leads when transferring from one container to another.

Operators should wear antistatic footwear and clothing and floors should be of the conducting type.

Keep away from heat, sparks and flame.

Avoid contact with skin and eyes. Avoid the inhalation of dust, particulates, spray or mist arising from the application of this mixture. Avoid inhalation of dust from sanding.

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed.

Put on appropriate personal protective equipment (see Section 8).

Always keep in containers made from the same material as the original one.

Comply with the health and safety at work laws.

Do not allow to enter drains or watercourses.

7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations.

Additional information on storage conditions

Observe label precautions. Store in a dry, cool and well-ventilated area. Keep away from heat and direct sunlight. Keep container tightly closed.

Keep away from sources of ignition. No smoking. Prevent unauthorised access. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

See Technical Data Sheet / packaging for further information.

7.3 Specific end use(s)

Recommendations Not available. Industrial sector specific solutions Not available.

page 4 | 9 safety data sheet #18,2900.01 Int / 20,06,2018

Section 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

8.1. Exposure controls

Exposure controls Provide good ventilation and/or an exhaust system in

the work area. Occupational exposure limit values: A: respirable fraction <= 1.25 mg/m3 and <= 10

mg/m3 E: inhalable fraction

Respiratory protection Wear a dust mask, in case of excessive dust. Res-

piratory protection must be worn whenever the WEL

levels have been exceeded.

Hand protection Wear suitable gloves. Suitable gloves type: Disposa-

ble gloves natural latex or Nitrile rubber Category 3 according to DIN EN 374 and DIN EN 420. Observe glove manufacturer's instructions concerning penetrability and breakthrough time. In case of prolonged or frequently repeated skin contact: Protect skin by

using skin protective cream.

Eye protection In case of dust formation: tightly sealed goggles ac-

cording to EN 166.

Body protection Wear suitable protective clothing. Avoid contact of

neck and wrists with the powder because of possible skin irritations and dermatitis. Wash thouroughly af-

ter contact with skin areas.

General protection and hygiene

measures

When using do not eat, drink or smoke.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance

Physical state

Colour

Odour

Odour threshold

pH

Melting point (dust)

Physical state

Solid. Powder.

Various.

Slight odour.

Not applicable.

Not applicable.

85 - 115 °C

Initial boiling point and boiling

Not applicable.

range

Flash point Not applicable. Evaporation rate Not applicable.

Flammability (solid, gas) Fine dust clouds may form explosive mixtures with air.

Lower explosion limit (dust)

Minimum ignition energy (mJ)

Vapour pressure

Vapour density

20 g/m³ (EN 14034-3)

10 - 30 (EN 13821)

Not applicable.

Not applicable.

Relative density 1.2 to 1.7 g/cm³ (ISO 8130-2/-3)

Solubility (ies) Insoluble in the following materials: cold water and hot

water.

Partition coefficient: n-octanol/

water

Not applicable.

Auto-ignition temperature for dust- >450°C

air mixture

Decomposition temperature >230°C

Viscosity Not applicable.

9.2. Other information

No additional information.

SECTION 10: Stability and reactivity

10.1. Reactivity No specific test data related to reactivity available for

this product or its ingredients.

10.2. Chemical stability The product is stable.

10.3. Possibility of hazardous reac- Under normal conditions of storage and use, hazardous

tions reactions will not occur.

10.4. Conditions to avoid No specific data.10.5. Incompatible materials Not applicable.

10.6. Hazardous decomposition Under normal conditions of storage and use, hazardous

products decomposition products should not be produced.

SECTION 11: Toxicological information

11.1. Information on toxicological effects

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Coating powders can cause localised skin irritation in folds of the skin or under tight clothing.

Acute toxicity estimates.

Not available.

Specific target organ toxicity (single exposure).

Not available.

Specific target organ toxicity (repeated exposure).

Not available.

Aspiration hazard.

Not available.

Potential acute health effects:

Eye contact

No known significant effects or critical hazards.

No known significant effects or critical hazards

Skin contact

No known significant effects or critical hazards

No known significant effects or critical hazards

No known significant effects or critical hazards

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact
Inhalation
Skin contact
Ingestion
No specific data.
No specific data.
No specific data.
No specific data.

Potential chronic health effects

General No known significant effects or critical hazards

Carcinogenicity

No known significant effects or critical hazards

Mutagenicity

No known significant effects or critical hazards

Fertility effects

No known significant effects or critical hazards

SECTION 12: Ecological information

12.1. Toxicity

Conclusion/Summary

12.2. Persistence and degradability

Conclusion/Summary Not available.

12.3. Bioaccumulative potential

Bioaccumulative potential Not available.

12.4. Mobility in soil

Soil/water partition Not available.

coefficient (Koc)

Mobility Not available.

12.5. Results of PBT and vPvB assessment

PBT Not applicable. vPvB Not applicable.

12.6 Other adverse effects No known significant effects or critical hazards.

SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

13.1. Waste treatment methods

Within the present knowledge of the supplier, this product is not regarded as hazardous waste, as defined by EU Directive 2008/98/EC.

If this product is mixed with other wastes, this code may no longer apply. If mixed with other wastes, the appropriate code should be assigned. For further information, contact your local waste authority.

SECTION 14: Transport information

Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

This preparation is not classified as dangerous according to international transport regulations (ADR/RID, IMDG or ICAO/IATA).

14.1. UN number Not regulated.

14.2. UN proper shipping name - 14.3. Transport hazard class(es) - 14.4. Packing group -

14.5. Environmental hazards No.

14.6. Special precautions Transport within user's premises: always transport in closed containers that are upright and secure. Ensure

that persons transporting the product know what to do in

the event of an accident or spillage.

Additional information

ADR / RID -

14.7 Transport in bulk Not available.

according to Annex II of Marpol and the IBC Code

IMDG Code Segregation group Not available.

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

EU Regulation (EC) No. 1907/2006 (REACH)

Annex XIV - List of substances subject to authorization

Substances of very high concern: None of the components are listed.

Annex XVII - Restrictions on the Not applicable.

manufacture,

placing on the market and use of certain dangerous substances, mixtures and articles Other EU regulations

Europe inventory Not determined.

15.2 Chemical safety

assessment

Not applicable.

SECTION 16: Other information

Further information

Hazard statements (CLP) H318 Causes serious eye damage.

H317 May cause an allergic skin reaction.

H411 Toxic to aquatic life with long lasting effects.

H302 Harmful if swallowed. H315 Causes skin irritation.

H373 May cause damage to organs (or state all or-

gans affected, if known)

through prolonged or repeated exposure (state route

of exposure if it is

conclusively proven that no other routes of exposure

cause the hazard). H332 Harmful if inhaled.

H335 May cause respiratory irritation.

H400 Very toxic to aquatic life.

H410 Very toxic to aquatic life with long lasting effects. The information in this data sheet has been estab-

lished to our best knowledge

and was up-to-date at time of revision.

Literature For abbreviations and acronyms, see: ECHA Guid-

ance on information requirements and chemical safety assessment, chapter R.20 (Table of terms and abbre-

viations).

Reason of change Data changed compared with the previous version.
